Buckets, Wringers and Combos

Bucket/Wringer Combos

Constructed of .024 in. mill-galvanized steel and hand soldered for extra strength and leak resistance. Top reinforced with 1-1/4 4" steel wire rim. Embossed, permanent graduations for easy measuring of water and solution. High quality, double ball bearing casters for easy mobility. 2" casters.

19-350-01 35 QT MOP BUCKET Each

Promote a safer workplace. The patented, molded-in WaveBrake inhibits wave formation, which reduces splashing by 40%. Buckets stack, even with the wheels attached, for more efficient storage. Tested to exceed 50,000 cycles, the wringers are more than twice as durable. 30° handle bend is easier on the user's wrist and shoulder. Reduces cross-contamination: Unique "bucket-in-bucket" design separates clean and dirty water, which reduces cross-contamination potential and leaves a cleaner, less slippery floor. Generating less than one-tenth the noise of a traditional mop bucket, the Quiet Caster Dolly allows you to work quietly in noise-sensitive environments, day or night. Bucket capacity: 35-qt. Wringer capacity: up to 32-oz. mops.

Glide-On Wax Applicator Kit

Pioneer Glide-On Wax Applicator Kit, 18". The applicator has a push-button flow control which applies the wax only when needed. It also locks open for large areas. It has a large tank opening which makes filling easy. The solution tank has a generous 52 ounce capacity which means less time refilling and is translucent which keeps solution level visible. The microfiber pad is launderable and puts a maximum even spread on the surface. There are no ties or snaps to deal with which makes the pad easy to deal with and can be attached and removed in seconds. The Glide-On weighs in at an easy-to-carry seven pounds with a full solution tank – making it easy to glide.

Floor Finish Applicators

Applicator Pads are effective in both domestic & commercial settings. Lambskin pads are cut from specially tanned, dense 3/4" hides. Lambskin and Wool pads are recommended for oil based finishes. Synthetic fiber pads are recommended for water based finishes.

LS165WR 16" LAMBSWOOL APPLICATOR Each

Starter kit includes: six microfiber finish pads RCP Q800, one quick-connect wet/dry frame RCP Q560 and one finish bucket RCP Q930. Designed for specialized floor cleaning and finish applications. Microfiber pads are traditional blue and white color, optimum shape for smooth, even application of floor finish. Advanced hook-and-loop backing attaches pad more securely, holds-up under harsh laundering conditions (more than 300 launderings). Quick-connect frame constructed of lightweight aluminum, flat profile is sanitary and easy to clean. Finish bucket is color-coded blue to differentiate use. Twist valve empties contents without lifting. Smooth, nonporous surface helps prevent bacterial growth and cleans easily. Shipping weight 12.1 pounds

Floor Finish Applicators

Wax-O-Matic Floor Finish Tool

This professional finish applicator machine applies both water and solvent based fluids including finishes, sealers, urethanes, restorers and disinfectants, quickly, easily and smoothly. Straight line method, with built-in edge feathering, covers many times the area of conventional methods-without the spills, drips and baseboard splashes! Push button dispensing and replaceable wick pads provide complete control of finish thickness. The Wax-O-Matic Finish Applicator covers about 30,000 square feet per hour and comes with a three gallon tank. Wick pads and manual included. Some assembly required. Comes standard with one set (two pads) of Ultra Refills.

PC228-3232 32 OZ. COTTON STRING BLEND Each

Looped End Mop Heads

Our looped-end wet mops meet the quality needed for the industrial, food-service, janitorial, and healthcare industry. Our large fan improves coverage, and double stitching of the tail band gives the looped end wet mop durability. In most cases looped end wet mops last 6 times longer than traditional cut end wet mops. Mops are constructed of 4-ply yarn which allows for excellent absorbency. By using this yarn in the form of looped end fantail, enables less lint and allows durability due to the fact the yarn won't unravel and wear out.
